The lifetime coverage offered by this warranty is designed to cover individual homeowners only. If you are an individual homeowner, this Lifetime Limited Warranty lasts for the life of the property on which the Products were originally applied for as long as you own the Property. If you are not an individual (e.g. school, church, government, partnerships, trusts, corporation, condominium, unincorporated association, or public entity, etc.), the warranty period will be 50 years from the date of the original installation of the Products on the Property, prorated as indicated in the Warranty Protection Schedule below. This Lifetime Limited Warranty may be transferred with the Property. CARE AND MAINTENANCE

Continental's Polymer Wall System resists most common household stains like oil and grease but it will become dirty like any other product that is exposed to atmospheric conditions. If your Polymer Wall System needs cleaning, we recommend the following procedures. Use an occasional washing with clear water using a garden hose and soft-bristled brush. For heavy dirt wash in the manner above, but use the following solution: 1/3 cup detergent (Tide for example) with 2/3 cup Trisodium Phosphate (Soilax, for example) and 1 gallon of water. If mildew has appeared use the following: 1/3 cup detergent (Tide for example) with 2/3 cup Trisodium Phosphate (Soilax for example) with 1 quart sodium hypochlorite 5% solution (Clorox for example) with 3 quarts water.

CAUTION Do not exceed the recommended concentrations of cleaners. To do so can cause damage to the Products' surface. Avoid skin and eye contact with the solution, and in all cases follow manufacturer's instructions for the use of cleaning compounds and solutions. Test any cleaner on an inconspicuous area before applying to major areas. Avoid use of abrasive type cleaners and strong solvents.

IMPORTANT FIRE SAFETY INFORMATION

Exterior polymer building materials require little maintenance for many years. Nevertheless, common sense dictates that builders and suppliers of polymer products store, handle and install polymer materials in a manner that avoids damage to the product and/or the structure. Owners and installers should take a few simple steps to protect polymer building materials from fire. Polymer Wall System is made from organic materials and will melt or burn when exposed to a significant source of flame or heat. Building owners, occupants and outside maintenance personnel should always take normal precautions to keep sources of fire, such as barbecues and combustible materials, such as dry leaves, mulch and trash, away from Polymer Wall Systems
